Tupperware® NO TIME TO WASTE

As a company, we have always used our business opportunities and our products to make an impact on the world around us. Tupperware® products are focused on helping people reduce their individual impact on the environment by minimizing their plastic and food waste.

We are committed to continually evaluating how we can further reduce our carbon footprint—from the design, production and packaging of our products, to how they get to your door and through their continual use. By 2025, our goal is to deliver our products to you in only compostable and biodegradable packaging. We encourage everyone to join us as we focus on the longevity of our planet by wasting less in our daily lives. And to do that, we have launched a movement called No Time to Waste. Take the pledge at sustainability.tupperwarebrands.com and help us make a difference.

If 2 million people chose to reuse their cup just once a week, it would save 104 million cups a year from landfill.²
